EDUCATION

University of Houston

Bachelor of Science in Computer Science

June 2026

Houston, TX

Relevant Coursework: Data Structures & Algorithms, Computer Organization and Architecture, Principles of Operating Systems, Intro to Automata & Computability, Graph Theory with Applications, Linear Algebra, Discrete Mathematics

EXPERIENCE

Bender Homestead, LLC

Software Engineer Intern

August 2025 – May 2026

Houston, TX

- Built a role-aware roofing performance dashboard that unified sales, marketing, payroll, roster, and CRM data into personal, team, and company-wide analytics views.
- Developed authenticated dashboards, user/role management, metric configuration, and entitlement-based access controls using **Next.js**, **TypeScript**, **Express**, **RTK Query**, and **Tailwind CSS**.
- Designed modular reporting services and scalable database architecture with **Drizzle ORM** and **Neon/Postgres**, including demo data for testing and onboarding.

H-E-B

In-store Shopper

March 2022 – Present

Houston, TX

- Select, sort, and unload items to complete eCommerce online orders while coordinating with multiple departments to resolve inventory and customer request issues.
- Communicate order substitutions and updates to customers while providing efficient curbside delivery service.

PROJECTS

ChessMyself Game

- Developed a dynamic chess game using **HTML**, **JavaScript**, Chessboard.js, and Chess.js, featuring a clickable move interface with real-time game state updates.
- Implemented custom piece themes, move validation, undo functionality, and board flipping mechanics, allowing for user-versus-self gameplay.

Movie Data Visualizer

- Developed a **Python** web scraper to extract movie data from Letterboxd, utilizing **Selenium** for automation and data collection. The scraped data is then automatically saved into a Google Sheet for further analysis and visualization.
- Leveraged **Looker Studio** to create dynamic visualizations, enabling in-depth exploration and presentation of movie data insights. The data is dynamically showcased on my personal website for public display.

Artificial Intelligence PDF Reader

- Built an AI-powered PDF question-answering application that enables users to query uploaded documents using **OpenAI** APIs and **Streamlit**.

Website Portfolio

- Created an online portfolio website using **HTML**, **CSS**, and **JavaScript**. Assured functionality across mobile, tablet, and desktop. Hosted using **GitHub pages**.

Best Buy Checkout Bot

- Developed a bot using **Python** to purchase any given item on the Best Buy website within seconds. Scripted a fully automated path utilizing **PyAutoGUI**, **Selenium**, and **Scrapy** to crawl to a given link, enter shipping/credit card information, and finalize checkout.
- Utilized the **Twilio API** to send an automated mobile text for purchase confirmation.

SKILLS

Programming Languages: Python, JavaScript, TypeScript, C, C++, Java, SQL, Bash, HTML, CSS

Frameworks & Libraries: React, Next.js, Node.js, Express.js, Tailwind CSS, Streamlit, Selenium, OpenCV, SFML

Databases & Tools: PostgreSQL, MySQL, MongoDB, Drizzle ORM, Git, Apache Subversion
